Registrant's telephone number, including area code: (609) 275-0500

Not Applicable
(Former name or former address, if changed since last report)

Check the appropriate box below if the Form 8-K filing is intended to simultaneously satisfy the filing obligation of the registrant under any of the following provisions (see General Instruction A.2. below):

- Written communications pursuant to Rule 425 under the Securities Act (17 CFR 230.425)
- Soliciting material pursuant to Rule 14a-12 under the Exchange Act (17 CFR 240.14a-12)
- Pre-commencement communications pursuant to Rule 14d-2(b) under the Exchange Act (17 CFR 240.14d-2(b))
- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Securities Registered Pursuant to Section 12(b) of the Act:

| <u>Title of Each Class</u> | <u>Trading Symbol</u> | <u>Name of Exchange on Which Registered</u> |
|---|-----------------------|---|
| Common Stock, Par Value \$.01 Per Share | IART | Nasdaq Global Select Market |

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933 (§230.405 of this chapter) or Rule 12b-2 of the Securities Exchange Act of 1934 (§240.12b-2 of this chapter).

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

ITEM 2.02 RESULTS OF OPERATIONS AND FINANCIAL CONDITION

On February 23, 2022, Integra LifeSciences Holdings Corporation (the “Company”) issued a press release announcing financial results for the quarter and full year ended December 31, 2021 (the “Press Release”). A copy of the Press Release is attached as Exhibit 99.1 to this Current Report on Form 8-K and is incorporated by reference into this Item. In the financial statements portion of the Press Release, the Company has included a reconciliation of GAAP revenues to organic revenues for the quarters and years ended December 31, 2021 and 2020. GAAP net income to adjusted earnings before interest, taxes, depreciation and amortization (“EBITDA”) for the quarters and years ended December 31, 2021 and 2020. GAAP net income to adjusted net income for the quarters and years ended December 31, 2021 and 2020. GAAP earnings per diluted share to adjusted earnings per diluted share for the quarters and years ended December 31, 2021 and 2020, and GAAP operating cash flow to free cash flow and adjusted free cash flow conversion used by management for the quarters and years ended December 31, 2021 and 2020.

In the Press Release, the Company provided forward-looking guidance regarding adjusted earnings per diluted share, but did not provide a reconciliation to GAAP earnings per share, because certain GAAP expense items are highly variable and management is unable to predict them with reasonable certainty and without unreasonable effort.

The information contained in Item 2.02 of this Current Report on Form 8-K (including the Press Release and selected historical financial information) is being furnished and shall not be deemed “filed” for the purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the “Exchange Act”), or otherwise subject to the liabilities of that Section. The information contained in Item 2.02 of this Current Report on Form 8-K (including the Press Release and selected historical financial information) shall not be incorporated by reference into any registration statement or other document pursuant to the Securities Act of 1933, as amended, or the Exchange Act, except as shall be expressly set forth by specific reference in any such filing.

Discussion of Adjusted Financial Measures

In addition to our GAAP results, we provide certain non-GAAP measures, including organic revenues, adjusted earnings before interest, taxes, depreciation and amortization (“EBITDA”), adjusted net income, adjusted earnings per diluted share, free cash flow and adjusted free cash flow conversion. Organic revenues consist of total revenues excluding the effects of currency exchange rates, revenues from current-period acquisitions and product divestitures and discontinuances. Adjusted EBITDA consists of GAAP net income excluding: (i) depreciation and amortization; (ii) other income (expense); (iii) interest income and expense; (iv) income tax expense (benefit); and (v) those operating expenses also excluded from adjusted net income. The measure of adjusted net income consists of GAAP net income, excluding: (i) structural optimization charges; (ii) divestiture, acquisition and integration-related charges; (iii) discontinued product lines charges; (iv) EU Medical Device Regulation-related charges; (v) COVID-19 related charges; (vi) convertible debt non-cash interest; (vii) intangible asset amortization expense; and (viii) income tax impact from adjustments. The adjusted earnings per diluted share measure is calculated by dividing adjusted net income attributable to diluted shares by diluted weighted average shares outstanding. The measure of free cash flow consists of GAAP net cash provided by operating activities less purchases of property and equipment. The adjusted free cash flow conversion measure is calculated by dividing free cash flow by adjusted net income.

The Company believes that the presentation of organic revenues and the various adjusted EBITDA, adjusted net income, adjusted earnings per diluted share, free cash flow and adjusted free cash flow conversion measures provides important supplemental information to management and investors regarding financial and business trends relating to the Company’s financial condition and results of operations. Management uses non-GAAP financial measures in the form of organic revenues, adjusted EBITDA, adjusted net income, adjusted earnings per diluted share, free cash flow and adjusted free cash flow conversion when evaluating operating performance because we believe that the inclusion or exclusion of the items described below, for which the amounts and/or timing may vary significantly depending upon the Company’s divestiture, acquisition, integration, and restructuring activities, for which the amounts are non-cash in nature, or for which the amounts are not expected to recur at the same magnitude, provides a supplemental measure of our operating results that facilitates comparability of our financial condition and operating performance from period to period, against our business model objectives, and against other companies in our industry. We have chosen to provide this information to investors so they can analyze our operating results in the same way that management does and use this information in their assessment of our core business and the valuation of our Company.

Organic revenues, adjusted EBITDA, adjusted net income, adjusted earnings per diluted share, free cash flow and adjusted free cash flow conversion are significant measures used by management for purposes of:

- supplementing the financial results and forecasts reported to the Company’s board of directors;
 - evaluating, managing and benchmarking the operating performance of the Company;
 - establishing internal operating budgets;
-

- determining compensation under bonus or other incentive programs;
- enhancing comparability from period to period;
- comparing performance with internal forecasts and targeted business models; and
- evaluating and valuing potential acquisition candidates.

The measure of organic revenues that we report reflects the increase in total revenues for the quarter and full year ended December 31, 2021 adjusted for the effects of currency exchange rates, revenues from acquisitions, revenues from divested products, and product discontinuations on current period revenues. We provide this measure because changes in foreign currency exchange rates can distort our reduction favorably or unfavorably, depending upon the strength of the U.S. dollar in relation to the various foreign currencies in which we generate revenues. We generate significant revenues outside the United States in multiple foreign currencies. We believe this measure provides useful information to determine the success of our international selling organizations in increasing sales of products in their local currencies without regard to fluctuations in currency exchanges rates, which we do not control. Additionally, significant divestitures, acquisitions and discontinued product lines can distort our current period revenues when compared to prior periods.

The measure of adjusted net income reflects GAAP net income adjusted for one or more of the following items, as applicable:

- Structural optimization charges. These charges, which include employee severance and other costs associated with exit or disposal of facilities, costs related to transferring manufacturing and/or distribution activities to different locations, and rationalization or enhancement of our organization, existing manufacturing, distribution, administrative, functional and commercial infrastructure. Some of these cost-saving and efficiency-driven activities are identified as opportunities in connection with acquisitions that provide the Company with additional capacity or economies of scale. Although recurring in nature, given management's ongoing review of the efficiency of our organization and structure, including manufacturing, distribution and administrative facilities and operations, management excludes these items when evaluating the operating performance of the Company because the frequency and amount of such charges vary significantly based on the timing and magnitude of the Company's rationalization activities and are, in some cases, dependent upon opportunities identified in acquisitions, which also vary in frequency and magnitude.
 - Acquisition, divestiture and integration-related charges. Acquisition, divestiture and integration-related charges include (i) up-front fees and milestone payments that are expensed as incurred in connection with acquiring licenses or rights to technology for which no product has been approved for sale by regulatory authorities and such approval is not reasonably assured at the time such up-front fees or milestone payments are made, (ii) inventory fair value purchase accounting adjustments, (iii) changes in the fair value of contingent consideration after the acquisition date, (iv) costs related to acquisition integration, including systems, operations, retention and severance, (v) legal, accounting, banking and other outside consultants expenses directly related to acquisitions or divestitures, and (vi) gain or loss on sale of business and related costs to complete the divestiture of business. Although recurring, given the ongoing character of our development and acquisition programs, these acquisition, divestiture and in-licensing related charges are not factored into the evaluation of our performance by management after completion of development programs or acquisitions because they are of a temporary nature, they are not related to our core operating performance and the frequency and amount of such charges vary significantly based on the timing and magnitude of our development, acquisition and divestiture transactions as well as the level of inventory on hand at the time of acquisition.
 - COVID-19 related charges. These charges relate to business interruptions and cost associated with the COVID-19 pandemic which impacted the Company's operations globally, partially offset by Coronavirus government relief programs. Due to the extraordinary one-time nature of the pandemic, management concluded that certain charges should be classified as special charges.
 - EU Medical Device Regulation charges. These charges represent costs specific to complying with the medical device reporting regulations and other requirements of the European Union's regulation for medical devices. Management excludes this item when evaluating the Company's operating performance because these costs incurred are not reflective of its ongoing operations.
 - Discontinued product lines charges. These charges represent charges taken in connection with product lines that the Company discontinues. Management excludes this item when evaluating the Company's operating performance because discontinued products do not provide useful information regarding the Company's prospects for future performance.
 - Intangible asset amortization expense. Management excludes this item when evaluating the Company's operating performance because it is a non-cash expense.
-

- Convertible debt non-cash interest. The convertible debt accounting requires separate accounting for the liability and equity components of the Company's convertible debt instruments, which may be settled in cash upon conversion, in a manner that reflects an applicable non-convertible debt borrowing rate at the time that we issued such convertible debt instruments. Management excludes this item when evaluating the Company's operating performance because of the non-cash nature of the expense. The Company adopted ASU No. 2020-06 Debt- Debt with Conversion and Other Options (Subtopic 470-20) and Derivatives and Hedging Contracts in Entity's Own Equity (Subtopic 815-40)-Accounting for Convertible Instruments and Contracts in an Entity's Own Equity on January 1, 2021. Upon the adoption of this standard, the Company's Convertible Senior Notes are now reflected entirely as a liability since the embedded conversion feature will no longer be separately presented within stockholders' equity. As such, the Company is no longer incurring non-cash interest expense for the amortization of debt discount.
- Income tax impact from adjustments. Estimated impact on income tax expense related to the following:
 - (i). Adjustments to income tax expense for the amount of additional tax expense that the Company estimates that it would record if it used non-GAAP results instead of GAAP results in the calculation of its tax provision, based on the statutory rate applicable to jurisdictions in which the above non-GAAP adjustments relate.
 - (ii). When we calculate the adjusted tax rate, we include a full year estimate for all discrete items. We then apply that full year rate to the year-to-date results and calculate the current quarter's rate to arrive at the year-to-date adjusted tax rate. We believe this removes significant variability in our results and creates a more operationally consistent result for our investors to use for comparability purposes.

In the Press Release, the Company provided forward-looking guidance regarding adjusted earnings per diluted share, but did not provide a reconciliation to GAAP earnings per share, because certain GAAP expense items are highly variable and management is unable to predict them with reasonable certainty and without unreasonable effort. Specifically, the financial impact and timing of divestitures, acquisitions, integrations, structural optimization and efforts to comply with the EU Medical Device Regulation are uncertain, depend on various dynamic factors and are not reasonably ascertainable at this time. These expense items could have a material impact on GAAP results.

Organic revenues, adjusted EBITDA, adjusted net income, adjusted earnings per diluted share, free cash flow and adjusted free cash flow conversion are not calculated in accordance with GAAP, and should be considered supplemental to, and not as a substitute for, or superior to, financial measures calculated in accordance with GAAP. Non-GAAP financial measures have limitations in that they do not reflect all of the revenues, costs or benefits associated with the operations of the Company's business as determined in accordance with GAAP. As a result, you should not consider these measures in isolation or as a substitute for analysis of the Company's results as reported under GAAP. The Company expects to continue to acquire businesses and product lines and to incur expenses of a nature similar to many of the non-GAAP adjustments described above, and exclusion of these items from its adjusted financial measures should not be construed as an inference that all of these revenue adjustments or costs are unusual, infrequent or non-recurring. Some of the limitations in relying on the adjusted financial measures are:

- The Company periodically acquires other companies or businesses, and we expect to continue to incur acquisition-related expenses and charges in the future. These costs can directly impact the amount of the Company's available funds or could include costs for aborted deals which may be significant and reduce GAAP net income.
- All of the adjustments to GAAP net income have been tax affected at the Company's actual tax rates. Depending on the nature of the adjustments and the tax treatment of the underlying items, the effective tax rate related to adjusted net income could differ significantly from the effective tax rate related to GAAP net income.

In the financial tables portion of the Press Release, the Company has included a reconciliation of GAAP reported revenues to organic revenues for the quarters and years ended December 31, 2021 and 2020 and GAAP net income to adjusted EBITDA, GAAP net income to adjusted net income, GAAP earnings per diluted share to adjusted earnings per diluted share, and GAAP operating cash flow to free cash flow and adjusted free cash flow conversion used by management for the quarters and twelve months ended December 31, 2021 and 2020. Also included are reconciliations for future periods.

News Release

Integra LifeSciences Reports Fourth Quarter and Full-Year 2021 Financial Results and Provides 2022 Financial Guidance

Princeton, New Jersey, February 23, 2022 - [Integra LifeSciences Holdings Corporation](#) (NASDAQ: IART) today reported financial results for the fourth quarter and full year ended December 31, 2021, consistent with its preliminary revenue results announced on January 11, 2022.

Fourth Quarter 2021

- Reported revenues were \$405.5 million, representing an increase of 4.3% on a reported basis and an increase of 8.3% on an organic basis compared to the fourth quarter 2020.
- GAAP earnings per diluted share were \$0.53, compared to \$1.09 in the fourth quarter 2020.
- Adjusted earnings per diluted share were \$0.84, flat compared to the fourth quarter of 2020.

Full-Year 2021

- Reported revenues were \$1,542.4 million representing an increase of 12.4% on a reported basis and an increase of 14.2% on an organic basis compared to full-year 2020.
- GAAP earnings per diluted share were \$1.98, compared to \$1.57 in 2020.
- Adjusted earnings per diluted share were \$3.18, compared to \$2.45 in 2020.

Key Accomplishments in 2021

- Divested the Extremity Orthopedics business and acquired ACell to expand the regenerative tissue portfolio.
- Completed the substantive manufacturing transfer of all Codman neurosurgical products.
- Launched CereLink® ICP Monitor in Europe and the U.S.
- Initiated phased clinical launch for the Aurora® Surgiscope® for minimally invasive neurosurgery and MIRROR registry for intracerebral brain hemorrhage.
- Filed SurgiMend® PMA and completed panel meeting with FDA Advisory Committee and are currently working with FDA on the path forward for a specific indication for post-mastectomy breast reconstruction.
- Published results of PriMatrix® multicenter study in diabetic foot ulcers demonstrating statistically and clinically significant results against standard of care.
- Marked the 25th anniversary of the U.S. approval of the Integra® Dermal Regeneration Template (IDRT) for the treatment of life-threatening burns.

- Recognized for the company's leadership in '2021 Best Company for Diversity' and 'Top 100 Healthcare Technology Company' lists.
- Successfully executed CEO transition with the appointment of Jan De Witte.

"Our 2021 financial performance and business achievements are a testament to our broad and differentiated product portfolio, and the resilience and commitment of our team members around the world, despite the ongoing effects of the global pandemic," said Jan De Witte, president and chief executive officer. "I look forward to working with my Integra colleagues to continue to execute our growth priorities and accelerate our product pipeline and global opportunities in 2022 and the years to come."

Fourth Quarter 2021 Financial Summary

Total reported revenues for the fourth quarter were \$405.5 million, an increase of 4.3% from the fourth quarter of 2020. Fourth quarter organic revenues increased 8.3% over the prior year. Total reported revenues include \$16.9 million from the acquisition of ACell, which was completed on January 20, 2021. Reported revenue for the fourth quarter 2020 included Extremity Orthopedics.

The Company reported GAAP net income of \$45.4 million, or \$0.53 per diluted share, in the fourth quarter of 2021, compared to GAAP net income of \$92.7 million, or \$1.09 per diluted share, in the prior year. The decrease in GAAP net income was driven primarily by a one-time net tax benefit in the fourth quarter of 2020, attributable to an intra-entity transfer of certain intellectual property resulting in the recognition of a \$59.2 million deferred tax benefit.

Adjusted EBITDA for the fourth quarter of 2021 was \$105.4 million, compared to \$102.7 million in the fourth quarter of the prior year. As a percentage of revenue, adjusted EBITDA was 26.0%, a decrease of 40 basis points from the prior year period.

Adjusted net income for the fourth quarter of 2021 was \$72.2 million, or \$0.84 per diluted share, compared to adjusted net income of \$71.3 million, or \$0.84 per diluted share, in the fourth quarter of 2020. The contribution of higher revenues in 2021 was offset by the gradual return of spending, which was below normal levels in the prior year in response to the global pandemic.

Cash flows from operations totaled \$69.3 million in the fourth quarter and capital expenditures were \$27.4 million.

Fourth Quarter 2021 Segment Performance

- Codman Specialty Surgical (67% of Revenues)
 - Total revenues were \$270.7 million, representing reported growth of 6.4% and organic growth of 9.0% compared to the fourth quarter of 2020. Sales in Instruments benefited from a strong recovery in order demand, while the strength in Neurosurgery was broad-based and included sales from our new CereLink ICP monitoring and continued recovery in sales of capital equipment.
- Tissue Technologies (33% of Revenue)
 - Total revenues were \$134.9 million, representing growth of 0.4% on a reported basis and organic growth of 6.7% compared to the fourth quarter of 2020. Organic growth in this segment was led by sales in Private Label and sales in Wound Reconstruction and Care, with strength in Integra Dermal Matrices and SurgiMend.

Full-Year 2021 Financial Summary

Total reported revenues for the full-year 2021 were \$1,542.4 million, an increase of 12.4%, from the prior year. Organic sales for the full-year 2021 increased 14.2% compared to 2020. Total reported revenues include \$65.4 million from the acquisition of ACell. Reported revenue for the full-year 2020 included Extremity Orthopedics.

The Company reported GAAP net income of \$169.1 million, or \$1.98 per diluted share, for the full-year 2021, compared to GAAP net income of \$133.9 million, or \$1.57 per diluted share in 2020. The increase in GAAP net income was primarily driven by increased revenues from procedure recovery from the COVID-19 impact in 2020 and the gain on sale of \$41.8 million from the Extremity Orthopedics business, partially offset by a one-time net tax benefit in the fourth quarter of 2020.

Adjusted EBITDA for the full-year 2021 was \$400.7 million, an increase of \$66.2 million over the prior year. Full year EBITDA margins were 26.0% an increase of 160 basis points from the prior year.

Adjusted net income for the full-year 2021 was \$271.7 million, or \$3.18 per diluted share, compared to \$208.7 million, or \$2.45 per diluted share in 2020. The increase was primarily attributable to increased sales in 2021 after the COVID-19 impact of 2020.

2021 Balance Sheet, Cash Flow and Capital Allocation

The Company generated record cash flow from operations of \$312.4 million for the full-year 2021. Full-year capital expenditures were \$48.0 million. Net debt at the end of the year was \$1.05 billion, and the consolidated total leverage ratio was 2.3x. As of year-end, the Company had total liquidity of approximately \$1.78 billion, including approximately \$513 million in cash and the remainder available under its revolving credit facility.

2022 Revenue and Adjusted Earnings Per Share Guidance

The Company's guidance for 2022 revenue and adjusted earnings per share reflects the continuing uncertainty around the scope and duration of the pandemic, and its related impacts on our business in the first half of the year. For the first quarter 2022, the Company expects reported revenues in the range of \$357 million to \$365 million, representing reported growth of approximately -1% to 1.5% and organic growth of approximately 0% to 2.5%. Adjusted earnings per diluted share are expected to be in a range of \$0.67 to \$0.71.

For the full-year 2022, the Company expects revenues to be in a range of \$1,580 million to \$1,600 million, representing reported growth of approximately 2.5% to 3.5% and organic growth of approximately 3.5% to 5%. Adjusted earnings per diluted share are expected to be in a range of \$3.27 to \$3.35.

Organic sales growth excludes acquisitions and divestitures as well as the effects of foreign currency and the year-over-year change in revenue from discontinued products. Organic growth includes ACell as of January 20, 2022.

The Company is providing forward-looking guidance regarding adjusted earnings per diluted share but is not providing a reconciliation to GAAP earnings per share, because certain GAAP expense items are highly variable, and management is unable to predict them with reasonable certainty and without unreasonable effort. Specifically, the financial impact and timing of divestitures, acquisitions, integrations, structural optimization and efforts to comply with the EU Medical Device Regulation are uncertain, depend on various dynamic factors and are not reasonably ascertainable at this time. These expense items could have a material impact on GAAP results. Adjusted earnings per diluted share also excludes the impact of intangible asset amortization associated with prior business acquisitions, which we expect to be approximately \$0.77 per diluted share for the full-year 2022.

2022 Share Repurchase

On January 12, 2022, the Company entered into an accelerated share repurchase agreement with Citibank, N.A. to repurchase \$125 million in the aggregate of the Company's outstanding shares of common stock, par value \$0.01 per share. The repurchase transactions are expected to be completed in the first half of 2022. The impact of the share repurchase is reflected in the 2022 adjusted earning per diluted share guidance range provided.

Conference Call and Presentation Available Online

Integra has scheduled a conference call for 8:30 a.m. ET on Wednesday, February 23, 2022, to discuss fourth quarter and full-year 2021 financial results, and forward-looking financial guidance. The conference call will be hosted by Integra's senior management team and will be open to all listeners. Additional forward-looking information may be discussed in a question-and-answer session following the call. Integra's management team will reference a presentation during the conference call, which can be found on the Investor section of the website at investor.integralife.com.

Access to the live call is available by dialing (888) 394-8218 and using the passcode 701830. A simultaneous webcast of the call will be available via the Company's website at www.integralife.com. A webcast replay of the call can be accessed through the [Investor Relations](#) homepage of Integra's website at www.integralife.com. A replay of the call will be available until March 5, 2022 by dialing (888) 203-1112 and using the passcode 701830.

About Integra

Integra LifeSciences is a global leader in regenerative tissue technologies and neurosurgical solutions dedicated to limiting uncertainty for clinicians so they can focus on providing the best patient care. Integra offers a comprehensive portfolio of high quality, leadership brands that include AmnioExcel[®], Aurora[®], Bactiseal[®], BioD[®], CerebroFlo[®], CereLink[®], Certas[®] Plus, Codman[®], CUSA[®], Cytal[®], DuraGen[®], DuraSeal[®], Gentrix[®], ICP Express[®], Integra[®], Licox[®], MAYFIELD[®], MediHoney[®], MicroFrance[®], MicroMatrix[®], NeuraGen[®], NeuraWrap[®], PriMatrix[®], SurgiMend[®], TCC-EZ[®] and VersaTru[®]. Forward-Looking Statements

This news release contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 that involve risks and uncertainties and reflect the Company's judgment as of the date of this release. All statements, other than statements of historical fact, are statements that could be deemed forward-looking statements. Some of these forward-looking statements may contain words like "will," "believe," "may," "could," "would," "might," "possible," "should," "expect," "intend," "forecast," "guidance," "plan," "anticipate," "target," or "continue," the negative of these words, other terms of similar meaning or they may use future dates. Forward-looking statements contained in this news release include, but are not limited to, statements concerning future financial performance, including projections for revenues, expected revenue growth (both reported and organic), GAAP and adjusted net income, GAAP and adjusted earnings per diluted share, non-GAAP adjustments such as divestiture, acquisition and integration-related charges, intangible asset amortization, structural optimization charges, EU Medical Device Regulation-related charges, convertible debt non-cash interest, and income tax expense (benefit) related to non-GAAP adjustments and other items, expectations and plans with respect to strategic initiatives and product development and the executive management transition. It is important to note that the Company's goals and expectations are not predictions of actual performance. Such forward-looking statements involve risks and uncertainties that could cause actual results to differ materially from predicted or expected results. Such risks and uncertainties include, but are not limited, to the following: the magnitude and duration of the COVID-19 pandemic and its effects on our employees, customers, patients, suppliers and distributors, including the economic impacts of the various recommendations, orders and protocols issued by governmental agencies and other regulatory bodies; the Company's ability to execute its operating plan effectively; the Company's ability to successfully integrate acquired businesses; the Company's ability to achieve sales growth in a timely fashion and execute on its channel reorganization in its Tissue Technologies segment; the Company's ability to manufacture and ship sufficient quantities of its products to meet its customers' demands; the ability of third-party suppliers to supply us with raw materials and finished products; global macroeconomic and political conditions; the Company's ability to manage its direct sales channels effectively; the sales performance of third-party distributors on whom the Company relies to generate revenue for certain products and geographic regions; the Company's ability to access and maintain relationships with customers of acquired entities and businesses; physicians' willingness to adopt and third-party payors' willingness to provide or maintain reimbursement for the Company's recently launched, planned and existing products; initiatives launched by the Company's competitors; downward pricing pressures from customers; the Company's ability to secure regulatory approval for products in development; the Company's ability to remediate quality systems violations; fluctuations in hospitals' spending for capital equipment; the Company's ability to comply with and obtain approvals for products of human origin and comply with regulations regarding

products containing materials derived from animal sources; difficulties in controlling expenses, including costs to procure and manufacture our products; the impact of changes in management or staff levels; the impact of goodwill and intangible asset impairment charges if future operating results of acquired businesses are significantly less than the results anticipated at the time of the acquisitions, the Company's ability to leverage its existing selling organizations and administrative infrastructure; the Company's ability to increase product sales and gross margins, and control non-product costs; the Company's ability to achieve anticipated growth rates, margins and scale and execute its strategy generally; the amount and timing of divestiture, acquisition and integration-related costs; the geographic distribution of where the Company generates its taxable income; new U.S. and foreign government laws and regulations, and changes in existing laws, regulations and enforcement guidance, which affect areas of our operations including, but not limited to, those affecting the health care industry, including the EU Medical Devices Regulation; fluctuations in foreign currency exchange rates; the amount of our bank borrowings outstanding and other factors influencing liquidity; and the economic, competitive, governmental, technological, and other risk factors and uncertainties identified under the heading "Risk Factors" included in Item 1A of Integra's Annual Report on Form 10-K for the year ended December 31, 2021 to be filed with the Securities and Exchange Commission.

These forward-looking statements are made only as of the date hereof, and the Company undertakes no obligation to update or revise the forward-looking statements, whether as a result of new information, future events, or otherwise.

Discussion of Adjusted Financial Measures

In addition to our GAAP results, we provide certain non-GAAP measures, including organic revenues, adjusted earnings before interest, taxes, depreciation and amortization ("EBITDA"), adjusted net income, adjusted earnings per diluted share, free cash flow and adjusted free cash flow conversion. Organic revenues consist of total revenues excluding the effects of currency exchange rates, revenues from current-period acquisitions and product divestitures and discontinuances. Adjusted EBITDA consists of GAAP net income excluding: (i) depreciation and amortization; (ii) other income (expense); (iii) interest income and expense; (iv) income tax expense (benefit); and (v) those operating expenses also excluded from adjusted net income. The measure of adjusted net income consists of GAAP net income, excluding: (i) structural optimization charges; (ii) divestiture, acquisition and integration-related charges; (iii) discontinued product lines charges; (iv) EU Medical Device Regulation-related charges; (v) COVID-19 related charges; (vi) convertible debt non-cash interest; (vii) intangible asset amortization expense; and (viii) income tax impact from adjustments. The adjusted earnings per diluted share measure is calculated by dividing adjusted net income attributable to diluted shares by diluted weighted average shares outstanding. The measure of free cash flow consists of GAAP net cash provided by operating activities less purchases of property and equipment.

Reconciliations of GAAP revenues to organic revenues and GAAP adjusted net income to adjusted EBITDA, and adjusted net income, and GAAP earnings per diluted share to adjusted earnings per diluted share all for the quarters ended December 31, 2021 and 2020, and the free cash flow and adjusted free cash flow conversion for the quarters ended December 31, 2021 and 2020, appear in the financial tables in this release.

The Company believes that the presentation of organic revenues and the other non-GAAP measures provide important supplemental information to management and investors regarding financial and business trends relating to the Company's financial condition and results of operations. For further information regarding why Integra believes that these non-GAAP financial measures provide useful information to investors, the specific manner in which management uses these measures, and some of the limitations associated with the use of these measures, please refer to the Company's Current Report on Form 8-K regarding this earnings press release filed today with the Securities and Exchange Commission. This Current Report on Form 8-K is available on the SEC's website at www.sec.gov or on our website at www.integralife.com.

(1) Adjusted net income for quarters and twelve months ended December 31, 2020 and 2021 are reconciled above. Adjusted net income for remaining quarters in the trailing twelve months calculation have been previously reconciled and are publicly available in the Quarterly Earnings Call Presentations on our website at investor.integralife.com.

The Company calculates adjusted free cash flow conversion by dividing its free cash flow by adjusted net income. The Company believes this measure is a useful metric in evaluating the significance of the cash special charges in its adjusted earnings measures.
